ABOUT

Chuba Makan is a cooking app developed by Chuba that provide recipes for variety of meals from different ethnicities and estimate the cooking time for each meal. It also offers daily cooking ideas for users.

Introduction

PROBLEM STATEMENT

Many people, especially those with busy schedules, face challenges in meal planning and coming up with new ideas for daily cooking. This can lead to repetitive meals, an increased number of outside food takeouts.

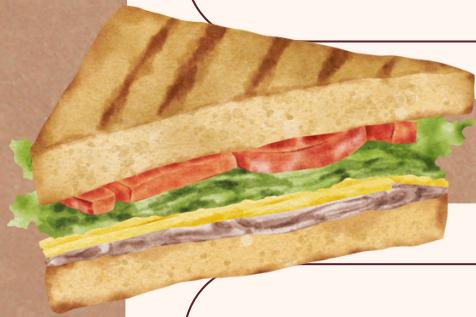

Chuba Makan is designed to tackle these issues by:

- Providing structured meal plans.
- Offering a variety of recipes to inspire cooking at home.
- Helping users to create recipe lists based on their chosen meal plans that saves time.

Introduction

TARGET AUDIENCE

The Chuba Makan app targets users such as busy individuals, university students, home cooks and foodies.

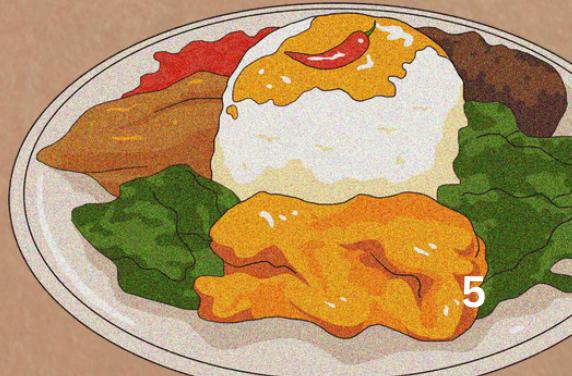

TARGET PLATFORM

This app will be launched on both Android and iOS platforms.

PLATFORM USED

The app is developed using Flutter and Google Firebase.

Objectives

- Convenient for users to find a variety of recipes
- Helps users to cook various types of meals
- Provides daily meal ideas for users
- Ensures convenience through organized meal planning
- Provide an organized meal plan to help users save time

Benefits

- Saves time with pre-planned meals.
- Saves cost by cooking at home.
- Users don't have to think about what they have to cook everyday.
- Inspire more people to cook delicious and variety of meals at home.
- Helps users discover new recipes from various ethnicities and improve their cooking skills.

App Features

- Login and Logout
- Search and filter recipes by ethnicity
- Upload your own recipes
- Manage and organize recipes
